PROJECTS

Machine Learning Algorithms In a Game

Sep 2024 - Present

Using Unity Engine and Python libraries, we try different machine learning algorithms to test which performs better and adjust the hyperparameters for the best result.

Maps Application

Feb 2024 - Jun 2024

We designed a user-friendly Java application using JavaFX, similar to Google Maps. You can choose between walking, cycling, or taking public transport, including transfer between busses. You can also customize a lot of things such as the distance calculating method using settings

Knapsack Problem

Sep 2023 - Feb 2024

Using Java, we designed an application where you can select between multiple algorithms to solve the knapsack problem which will fit the items in a space in the most optimal way

WORK EXPERIENCE

Windsurf Instructor

July 2022 - September 2022

Bojark Windsurf Club

I have been windsurfing for nearly four years, and in July 2022, I started working as an official windsurf instructor at Bojark Windsurf Club, Bodrum. I have achieved a lot of skills such as leadership and time management, and I learned how to earn money and its value. It was a great experience for me.
